DETAILED ACTION

1. This communication is in response to the amendment filed on June 20, 2011, titled: "Bid/Offer Spread Trading".

Status of the Claims

2. Claims 28 and 40 have been amended. Claims 1-27 were previously cancelled. Accordingly, claims 28-46 remain pending in this application and have been examined.

Claim Rejections - 35 USC § 101

3. Claim 28 was rejected because its preamble does not specify that the method is implemented by a machine. Applicant seems to have overlooked that the rejection was on the preamble only, not the body of the claim. However, Applicant has clarified that it is not required for the preamble to specify the method is implemented by a machine. Hence, the rejection is withdrawn.
4. Claims 40-46 were previously rejected because claim 40 did not specify that it is non-transitory. Applicant has amended the claim to address the rejection. Hence, the rejection is withdrawn.

Allowable Subject Matter

5. Claims 1-19 (renumbered from claims 28-46) are pending. All pending claims are allowed.
6. The following is an examiner's statement of reasons for allowance:

7. The closest reference is Wiseman (U.S. Patent No. 5,168,446). Wiseman teaches a system for processing spot trades in selected commodities among a group of trading stations in a communication network through a series of structured stages. Each trading station is capable of initiating a transaction with any other trading station in the network by transmitting a request for a quotation on a selected commodity. The receiving, or counterparty, trading station responds by transmitting a quotation back to the initiating trader, and the trader transmits a proposal based on this quotation. The counterparty then transmits an acceptance of the proposal and upon receipt of this acceptance by the initiating trader, a confirmation signal is automatically transmitted back to the counterparty and the deal is automatically logged at both sites. Alterations of transmitted quotations and proposals and extensive negotiation are also possible.

8. With regards to claims 1 and 13 (renumbered), Wiseman, alone or combined with other prior art of record, fails to teach or render obvious the uniquely patentable feature of *“a method comprising the steps of: at a computer system, receiving a first order from a first party, in which the first order indicates a first spread with which to make a market for a financial instrument and a second spread at which to make a market for the financial instrument, and in which the first order includes an acceptance by the first party to participate in the market at the first spread and an acceptance by the first party to make a market at the second spread if the second party accepts the command; at the computer system, receiving a second command from the second party, in which the second command comprises at least one of an acceptance of the first spread and an acceptance of the second spread; if the second command comprises the acceptance*

Art Unit: 3694

of the first spread, requiring the first party to submit a third command indicating at least one of a buy and a sell of the financial instrument at a price reflecting the first spread, and if the second command comprises the acceptance of the second spread, requiring the second party to submit a third command indicating at least one of a buy and a sell of the financial instrument at a price reflecting the second spread”.

9. Examiner has performed an updated search and did not identify any references that disclose the claimed invention, or could be reasonable to combine with the Wiseman reference. For this reason, independent claims 1 and 13 and dependent claims 2-12 and 14-19 are allowed.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Pertinent prior art: “Taken aback by a leap forward”, Antony Currie, Euromoney Electronic Publications, v337, p 61-76, May 1997, ISSN: 0014-2433.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

12. Claims 1-19 (renumbered) are allowed.
